

Role of SMDC on Promoting School Level Education System

* Babulal (S.S. Master)

ABSTRACT

This paper deals with function of SMDC (School Management and Development Committee) set up by the Government for improving Secondary School Level Education System.

Introduction:

Education is a natural, harmonious and progressive development of man's innate powers. It provides children, youth and adults with the power to reflect, make choices and enjoy a better life. In ancient India, Education was almost teacher centred. The whole system of education revolves round the teachers. They played the key role in teaching - learning process. They decided that - Whom to teach?, What to teach? and how to teach? Maximum number of teachers tried to maintained their uniqueness those days.

Involvement of the Society in the School System was negligible. If the society is indifferent towards the education system. There is no reason to expect its children to get good education. If people want their children to be educated properly, They should be willing and ready to put their efforts in the development of education system. So the participation of the society is most important in the education system. This participation should be at the grassroots level. If the school servers the society through education, in turn the society will help enhancing the status of the school. On the other hand. If he the Society supports the school in educational progress, in turn, the school will help in improving the society.

Need of the Study :

Secondary education is the weakest link in our education system since independence. One of the greatest weakness for poor progress in secondary education is the lack involvement of community in school functioning. For past one year, SMDC member have been working for strengthening education system. SMC/SMDC made and aware their role and responsibilities as enshrined under "The right to Free and Compulsory Education Act - 2009. The SMC/SMDC was

unaware of its role to initiate the process at its own level.

Objective of The Study :

To find out the effectiveness of SMDC at the grassroots level of education. To study the functions done by SMDC in improving the education system at secondary level.

Method: Analytical Survey Method was used.

Sample : Schools related to Block Education Office Pataudi, Gurgaon (Haryana). Ten chairmen of SMDC were interviewed.

Result and Discussion : SMC represents SMDC is responsible for all activities including planning, collection of data under SEMIS (Secondary Education Management and Information System), implementation, monitoring, evaluation and taking corrective remedial actions on all the component, intervention of the scheme - infrastructural as well as academic and other activities at School level. The School annual minor and major repairing grant is being released for the year 2011-12 @ 7500, for butification and office maintainance, 25000 for Science equipments, library books, 1500 for Electric Bill and Five Lac for a room construction per school. SMDC is fully involned in spent the mentioned sum. SMDC members are proposed to involve in taking care of the school Situation and help the school in managing the different activities. SMDC is fully involved in the upliftment of the School Standard at Secondary level 100% Co-operation had been paid in the last year. But I have seen a thing there is a lack of guidance and counselling in the members of SMDC If they guided properly they work well. Instead of all the role of SMDC can not be ignored at any stage. SMDC takes Satisfactorily Steps for good result in the school at any stage. Thus the effectiveness of SMDC is constructive and necessary for secondary school progress and improvement
